

JULY 2018

DELUXE ANNOUNCES A NEW PARTNERSHIP WITH TESLAR BY 3E.

Deluxe is excited to announce a partnership between Banker's Dashboard and Teslar by 3E. The partnership provides financial institutions with a powerful set of tools aimed at maximizing net interest margin performance.

Dashboard equips clients with the tools to help them drive stronger net interest margin, typically outperforming the market by 37 bps on average. Meanwhile, Teslar provides in-depth reporting and analytics that are complimentary to Dashboard with a suite of over 20 modules. This unique partnership of complementary solutions gives our clients the ability to manage their performance at an unparalleled level.

About Teslar by 3E

Teslar enables financial institutions to streamline their daily tasks with an intuitive SAAS-based solution. The solution is designed to improve efficiency by making information more available through its 20 different modules including:

- Access account level detail on loans and CDs so you can quickly learn which relationships are profitable
- Detailed scorecards that give insights into the performance of individuals, branches, and regions
- Customizable workflows and dashboards to streamline any process, from a late fee waiver to a complete loan origination pipeline
- Comprehensive reporting tools on all metrics and departments of the institution

Learn why Teslar has a 100% customer retention rate by visiting their website www.teslarby3e.com.

About Banker's Dashboard

Banker's Dashboard is a subscription-based performance management platform that enables institutions to drive high-performance and create and maintain a culture of performance and accountability at every level of their organization:

- Decision modeling to optimize client performance
- Automated tools to ensure organizational alignment and empowerment
- Integrated budget tool with all financial data right at your finger tips
- Branch comparison tool drives messaging around performance management and aligns behavior.
- Alerts and performance comparisons for course corrections
- Enhanced daily reporting with drill down to group, account, and officer level.
- Targeting of loans and CDs priced below or above the weighted average rate, respectively.
