TESLAR BY 3E ANNOUNCES A NEW PARTNERSHIP WITH DELUXE.

3E Software is excited to announce a partnership between Teslar and Banker's Dashboard. The partnership provides financial institutions with a powerful set of tools aimed at maximizing net interest margin performance.

The Teslar SaaS solution helps create highly efficient banks that maintain an average efficiency ratio 14% higher than those in their peer groups. Meanwhile, Banker's Dashboard equips clients with the tools to help them drive stronger net interest margin, typically outperforming the market by 37 bps on average. This unique partnership of complementary solutions gives our clients the ability to manage their performance at an unparalleled level.

About Teslar by 3E

Teslar helps create highly efficient banks by empowering lenders, streamlining their processes and integrating all their data sources into a single, powerful interface while also maintaining scalability to support growth far into the future. These four pillars drive everything we do and underpin all 20 plus modules in Teslar, including:

- Exception, policy and covenant tracking
- Internal loan review and annual/term review
- Officer scorecard and portfolio management system
- Comprehensive forms and workflow engine
- Construction inspection and draw tracking
- Criticized and special asset management
- Relationship builder with automated aggregation
- Intuitive Dashboard interface
- Guaranteed core and image integration

About Banker's Dashboard

Banker's Dashboard is a subscription-based performance management platform that enables institutions to drive high-performance and create and maintain a culture of performance and accountability at every level of their organization:

- Decision modeling to optimize client performance
- Automated tools to ensure organizational alignment and empowerment
- Integrated budget tool with all financial data right at your finger tips
- Branch comparison tool drives messaging around performance management and aligns behavior.
- Alerts and performance comparisons for course corrections
- Enhanced daily reporting with drill down to group, account, and officer level.
- Targeting of loans and CDs priced below or above the weighted average rate, respectively.
